Unified Cloud Connection
Sign in just once on the MFP to connect to multiple cloud services, such as Microsoft Teams. Downloading apps from the cloud is easy. And updates are displayed clearly, so you're always using the latest version of services.

Solid Security
The MFP has multiple levels of security to protect itself—and your data. When booting up, the MFP checks for anomalies in the BIOS firmware. And optional software prevents attacks on connected devices.

Link Mobile Devices
Mobile devices installed with the Sharpdesk Mobile app*1 can connect directly to the MFP for printing or downloading scanned data. The MFP can also be equipped with AirPrint and the Sharp Print Service Plugin.

Wireless LAN Connection
The MFP works with the 5 GHz band to ensure minimal radio interference and stable high-speed communications. The MFP also supports Wi-Fi Protected Setup™, so it can connect to a wireless LAN without the need for an SSID and security key.

7.0-inch Full-flat Touchscreen
With a variety of functions accessible via simple, intuitive icons, MFP operation is smooth and easy.

Speedy RSPF
The RSPF (reversing single pass feeder) efficiently feeds in either one- or two-sided originals—in batches of up to 50 sheets. With scanning speeds of up to 40 opm*2 (one-sided), the MFP can complete large jobs with ease and efficiency. A dedicated business card feeder on the RSPF does one-sided scanning of batches of up to 25 cards.

Smart Scanning
Simply tap the Auto Set button and the MFP will automatically determine the optimal resolution, gradation, and compression rate for your scan jobs. It also automatically reorients pages right side up (option) and corrects any skewed sheets.
On-screen System Information
The LCD shows the state of your MFP, displaying current operation and notifications for things like paper, toner, and maintenance.

*1: Availability varies by country/region.
*2: Originals per minute; when feeding A4 sheets.
